

RATED A SUCCESS

How SaaS Disrupters are Winning the Game with Usage-Based Billing and Rating Models

Innovative SaaS companies are making the transition from traditional licensing models to usage-based paradigms—drawn by the opportunity to disrupt existing markets, and capture increased revenue share. By 2022, 30% of enterprise software companies¹ will be competing with SaaS businesses, offering comparable solutions with elastic, pay-as-you-go payment models.

3 REASONS

SaaS Companies are Switching to Usage-Based Models

Attract Customers

41%

of enterprise procurement professionals² cite cost containment as their top priority. Reduce barriers to entry with usage-based billing.

Increase Retention

<30%

of SaaS companies³ are meeting customer retention goals. Eliminate churn when you align perceived value with cost.

Drive Revenue

60%

of SaaS providers⁴ are developing subscription models that give customers more ways to buy. Test drive features with usage-based "add-ons."

6 WAYS for SaaS Companies to Rate and Bill for Customer Usage

Stored Value
Give customers a value to draw from over a period

Tiered &/or Tapered
Establish levels of use, &/or taper costs for higher tiers

Allowance
Set an amount and bill for less (or more) usage

Time
Charge for peak usage days & times

Volume
Provide discounts for high consumption

Demand
Capitalize on surges in demand with dynamic pricing

How to Avoid Becoming

"SHELFWARE"

with an Intelligent Billing Platform

of SaaS companies⁵ have the right systems in place to implement a usage-based model.

goTransverse's intelligent billing platform, with its native rating engine, automates the process of rating events across multiple variables, matching them to customers, and applying the right charges to their accounts in near real-time.

Contact goTransverse today to learn how to turn your billing into a competitive advantage.

"goTransverse was invaluable in helping transition us to a new billing model for our existing products, and providing a platform that enabled us to introduce new product offerings in an expedited manner."
